# THE NUTRITION FOUNDATION

The Nutrition Foundation was organized by food and related manufacturers in December, 1941, as a sincere expression of their interest in scientific progress and human health. The basic purposes of the Foundation are: (1) the development of a comprehensive program of fundamental research, providing basic information in the science of nutrition; and (2) the support of educational measures that will assist in making the science of nutrition effective in the lives of present and future generations.

The Foundation functions chiefly through grants-in-aid in support of research in university medical centers where there are facilities for research in the basic sciences and public health.

The entire program is one of public service. The funds of the Foundation are obtained through voluntary contributions from members and donors. Grants are normally made twice each year, to become available on January 1st or July 1st.

### Officers of The Nutrition Foundation

Chairman of the Trustees—JAMES R. KILLIAN, JR.
Chairman, Board of Directors—W. B. MURPHY
Vice Chairman, Board of Directors—L. S. BICKMORE
President and Scientific Director—PAUL B. PEARSON
Executive Secretary and Treasurer—HORACE L. SIPPLE

The Board of Trustees, the governing body of the Foundation, consists of representatives of contributing members and representatives of the general public.

The publication of NUTRITION REVIEWS has been undertaken to enable professionally trained people to keep abreast of current progress, and to have available an unbiased, authoritative review of the current research literature in the science of nutrition.

The Editorial Staff has been carefully selected so that the publication will merit, in reasonable degree, the confidence of the medical profession and others who work directly with the public in the field of nutrition. The service provided by the publication is distinct from that of an abstract journal, a review for laymen, or an extensive scientific review. Since the reviews as originally prepared by a member of the Editorial Staff are frequently modified by special referees and may be further modified by the Editorial Office in preparing final copy for the press, the Editorial Committee feels that it is preferable not to affix the names of Editorial Staff members to individual reviews. There is thus a high degree of group responsibility on the part of the Editor and Associate Editors.

Signed articles do not necessarily represent the opinion of the Editorial Staff.

No. 4, April 1965

**Growth and Nutrition of Lebanese Children,** by Calvin Woodruff ..... 97
Sucrose Intolerance: An Enzymatic Defect ..... 101
Obesity and Plasma Levels of Insulin and Growth Hormone ..... 102
Ovine Body Temperature Variation ..... 104
Effects of Hypervitaminosis A on Tadpole Metamorphosis ..... 106
Metabolism of Plasma Cholesterol Esters ..... 108
Threonine Deprivation and Protein Synthesis ..... 111
Warfarin and a Thrombogenic Diet in Rats ..... 112
Sequential Changes in Liver and Serum Cholesterol Esters after Feeding Cholesterol-4-$C^{14}$ ..... 115
Dietary Sodium and Experimental Dental Caries ..... 117
Oxidative Phosphorylation in Liver Mitochondria from Fat Deficient Rats ..... 119
Synthesis of Polyunsaturated Fatty Acids by Liver Cell Fractions ..... 122
Ethionine Inhibition of Protein Synthesis ..... 125
Sodium Fluoride and Otosclerosis ..... 128
Recent Book ..... 128

No. 5, May 1965

**Iron Balance in Man,** by Clement A. Finch ..... 129
Breast Feeding and Polio Susceptibility ..... 131
Serum Magnesium Levels in the Newborn Child ..... 133
The Choice of Antacid in Treatment of Peptic Ulcer ..... 134
Histidine, Phenylalanine, and Tyrosine Metabolism in Kwashiorkor ..... 137
Lysine-Arginine Antagonism ..... 139
Conversion of Linoleic and Linolenic Acid Metabolites to Prostaglandins ..... 141
Rat Coronary Atheromata Induced by Essential Fatty Acid Deficiency ..... 144
The Thymus and Immunologic Competence ..... 146
Effects of Obesity on Exposure to High and Low Pressure ..... 149
Effects of Fasting and Refeeding on Fatty Acid Synthesizing Enzymes in Liver ..... 151
Insulin and Enzyme Induction ..... 153
The Fine Structure of the Early Atherosclerotic Lesion ..... 155
Rumen Gas Disposition ..... 157
Letter to the Editor ..... 159
Enzymes in Intestinal Contents of Conventional and Germfree Chickens ..... 159
